Panasonic's multi-split air conditioning systems are designed to accommodate long lengths of piping. Because piping for each circuit can be extended up to 25 metres, more flexibility is available for setting up outdoor units. As a result, the exterior appearance of a building can be preserved. (Note that for System 3, which comprises three piping circuits, the total length of piping may not exceed 60 metres.)

Multi-Split Packaged Air Conditioner - Panasonic

Panasonic's ingeniously designed outdoor units are compact in size to fit into any space and layout. Its smaller size makes it easy to install even in limited spaces. Flexibility in piping allows more freedom in installation leading to a reduced installation costs.

Dansk resumé.

A comprehensive homeowner's reference guide to remodeling a home arms readers with time-saving information on architectural styles, construction types, roofs, materials, lighting options, flooring, doors, windows, and much more. Original.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

In the rapid growth of the Chinese economy as the "world's factory and market", while this process has been supported by foreign companies, local Chinese companies have also emerged in the brief span of about 10 years to become major players. This is an extremely rare case in the world history and recently even among the BRICs and the NIEs. One cannot help but wonder what strategic positions foreign firms have adopted to cope with the extraordinary, fierce challenges they have had to face from local Chinese firms. A workshop discussed and illuminated the corporate activities and competitive and cooperative strategies of both Chinese and foreign firms from the perspective of Japanese, European, US and Asian firms.

Residential Open Building, the result of a CIB Task Group 'Open Building Implementation', provides a state-of-the-art review of open building, fundamental principles, recent developments, and international coverage of current projects on both the public and private arena. Open Building is a highly flexible and economical method of building which has far reaching advantages for urban designers, architects, contractors, developers and end users.
