This exciting new textbook for introductory psychology helps to open students' minds to the idea that psychology is all around us. Authors RON COMER and LIZ GOULD encourage students to examine what they know about human behaviour and how they know it; and open them up to an appreciation of psychology outside of the classroom. Psychology Around Us helps students see the big picture by stressing the interconnected nature of psychological science. Almost every chapter within this first edition helps open students' minds to comprehend the big picture with sections that highlight how the different fields of psychology are connected to each other and how they connect to everyday life. This text highlights human development, brain function, abnormal psychology, and the individual differences in each area as cut-across themes to demonstrate these connections. Also included are two-page art spreads to demonstrate exactly What Happens In The Brain When we engage in everyday activities such as eat pizza, study psychology, or listen to music. The art featured in these spreads have been created especially for Psychology Around Us by an award-winning artist with input from faculty on how it will contribute to teaching and learning. Features: Cut Across Connections - Almost every chapter helps students comprehend the big picture with sections that highlight how the different fields of psychology are connected to each other and how they connect to everyday life. What Happens in the Brain When...These two-page art spreads demonstrate exactly what happens in the brain when we engage in everyday activities such as eating pizza, studying psychology, or listening to music. Chapter Opening Vignettes - Every chapter begins with a vignette that shows the power of psychology in understanding a whole range of human behaviour. This theme is reinforced throughout the chapter, celebrating the extraordinary processes that make the everyday possible. Special topics on psychology around us - Each chapter highlights interesting news stories, current controversies in psychology, and relevant research findings that demonstrate psychology around us. The Practically Speaking box emphasizes the practical application of everyday psychology. Helpful study tools - Key Terms; Marginal Definitions; Marginal Notes; Chapter Summaries.

The FIMS Team Physician Manual is the official sports medicine handbook of the International Federation of Sports Medicine (FIMS), the world's oldest sports medicine organization. Now in a fully revised and updated third edition, the book offers a complete guide to the background knowledge, practical techniques and professional skills required to become a successful medical practitioner working in sport. Well illustrated, with clear step-by-step guidance, plus text boxes and checklists for quick reference, the Team Physician Manual covers every key area of activity and intervention, from the preparticipation examination to rehabilitation. The book surveys every classification of sports injury, offering clear advice on fieldside assessment, diagnosis and treatment, as well as examining best practice in general aspects of sports medicine, such as prevention and the psychology of injury. Written by a team of world-leading physicians from North and South America, Europe, Africa and Asia, this book is a 'must have' reference for any doctor, physical therapist, or medical professional working in sport.

« Facade Construction Manual » provides a systematic survey of contemporary expertise in the application of new materials and energy-efficient technologies in facade design. It surveys the facade design requirements made by various types of buildings, as well as the most important materials, from natural stone through to synthetics, and documents a diversity of construction forms for a wide range of building types.
