As children, they meet. Bray and Yarrow have little in common. She's all fire. He's all heart. But the same ancient symbol brands their skin, marking them as members of the Chisiana-a superhuman society of scholars and warriors. Together, they travel far to undergo a brutal initiation trial, and form a bond that neither can forget. As young adults, they clash. Years later these friends-turned-rivals reunite, and fond memories won't stop them from crossing swords. She doesn't trust him. He doesn't understand her. But if they don't learn to work together, a troubling string of deaths will remain unsolved. And the fate of their kind could hang in the balance. " McCarron manages to successfully bridge modern ideals and an ancient world in this coming-of-age tale." -Publishers Weekly

The coastal and archipelago areas in the Baltic Sea are popular destinations for a number of tourists. An important group of tourists is boaters, who visit the coastal areas during a short summer period. Boat owners are sometimes pictured as having a great interest for the nature and a willingness to do right. Pollution from pleasure boats such as discharges of oil and fuel, antifouling paints and cleaning agents have a negative impact on the coastal environment. Environmentally sound alternatives exist to some extent, but are not very common. Sustainable alternatives for boaters are lacking behind. One of the underlying purposes of this study was to understand how we can help boat owners change their behaviour and decrease the negative impact on the marine environment. The survey among boaters has been conducted in Finland, Sweden and Denmark with a web based survey ordered by the Keep Sweden Tidy Foundation together with Keep the Archipelago Tidy Association in Finland and the Danish Outdoor Council. The research was performed by SIFO Research International.

Birds of Prey (Mga Ibong Mandaragit) is a story of the valiant fight for justice and social change during and after the Japanese occupation of the Philippines in World War II. Originally written in Tagalog by revered Philippine National Artist in Literature Amado V. Hernandez, and translated to English by Estelita Constantino-Pangilinan, this socio-political novel depicts the oppression of the Filipino people by both the brutal occupiers and their own corrupt leaders, while holding out hope for a vision of an egalitarian society. Inspired by Jose Rizal's novels, it is a sequel to El Filibusterismo. Birds of Prey follows Mando Plaridel, the guerrilla warrior who discovers his strength and greater purpose as he searches for and finds the treasure left behind by Rizal's protagonist Simoun.This historical fiction examines one country's past but its message resonates with the real and present struggles in societies around the world.

In his latest book, Calder walks the reader through the repair, maintenance, and setting up of the boat's primary systems, including the electrical system, electronics equipment, generator sets, solar panels, wind and water generators, the engine, transmission, pumps, steering, waste disposal systems, and more. Destined to become a highly trusted companion aboard all types of boats for years to come.

If you can build websites with CSS and JavaScript, this book takes you to the next level—creating dynamic, database-driven websites with PHP and MySQL. Learn how to build a database, manage your content, and interact with users. With step-by-step tutorials, this completely revised edition gets you started with expanded coverage of the basics and takes you deeper into the world of server-side programming. The important stuff you need to know: Get up to speed quickly. Learn how to install PHP and MySQL, and get them running on both your computer and a remote server. Gain new techniques. Take advantage of the all-new chapter on integrating PHP with HTML web pages. Manage your content. Use the file system to access user data, including images and other binary files. Make it dynamic. Create pages that change with each new viewing. Build a good database. Use MySQL to store user information and other data. Keep your site working. Master the tools for fixing things that go wrong. Control operations. Create an administrative interface to oversee your site.
