The National Severe Storms Laboratory serves the nation by working to improve the leadtime and accuracy of severe weather warnings and forecasts in order to save lives and reduce property damage.

NOAA National Severe Storms Laboratory

Description. Weather Lab is an online interactive tool, or app, that helps students visualize how North America's weather is formed in the Spring. The app models the interactions between various air masses and ocean currents and describes probable weather outcomes. Students choose an ocean current and two air masses and the lab describes the characteristics of each.
